Then the food norms were raised and apart from bread (650 grams) and soup twice a day, the prisoners even got porridge two times daily. This made it remembly sure that one could survive and no longer feared starving to death. Moreover, the prisoners could count on receiving the food they were entitled to get. The authorities did everything in their power to see to it that the prisoners got their food. If something happened which made it impossible to distribute the food properly -- a breakdown in the bakeries, e.g., - it was the general rule that the missing food was added to the next day's quota. Money & Food: "Since 1952, the prisoners have received pay for their labor. Expenses for their lodgings and food were deducted from the pay before it was paid out to the prisoners, but now and then it happened that they really could get some money, which could then be spent in the camp canteen. 25X1 3. 25X1 CONFIDENTIAL D106687 DISTRIBUTION - STATE NAVY AIR This report is for the use within the USA of the Intelligence components of the Departments or FB! The medium had been excellent and had said that certain prisoners would receive a parcel soon, and foretold exactly what the parcel would contain. Disappointment in the USA: "When Eisenhower became President, everybody was very much excited and hopeful. His first speeches and promises of liberty to all people, and the official declarations that policy of containment was now at an end and the policy of liberation would be inaugurated, spread like wildfire all over the country and were unconditionally believed. However, as high as the hopes had been, as great too was the disappointment when months and months passed and nothing happened. The people feel that they have been let down. They feel they have been promised help from the US, and they have received nothing; they feel they have been promised freedom, and they are still slaves.

US prestige has suffered considerable damage and US popularity has fallen. People cannot understand why the US, spich in their opinion is the most powerful country in the world, tolerates the Soviet tyranny without doing anything about it spart from making bombastic promises.
